

Louisiana Pecan Damage Survey - 2008

1. What are your major pecan varieties grown in your orchard and how large is your orchard?
2. What types of tree structural damage occurred in your orchard? ie: trees lost, major scaffolds broken, small limb breakage, trees defoliated, no damage. What varieties appeared to have the greatest damage?
3. Due to the hurricane, what percent nut loss did you have? What was the size of your crop this year? (on-year or off-year, estimated pounds per acre).
4. Do you have damage to equipment, supplies or buildings used in your pecan operation? Please describe damage.
