There is an increasing interest in portable sawmills. With the growing emphasis on renewable energy, green building and carbon sequestration, more people are concerned about making environmentally conscious choices. Whether it is timber that was blown down by strong winds, property maintenance or sale of valuable timber, the use of a portable sawmill offers the convenience of personalized service and tailored processing.

Finding a portable sawmill for hire or for purchase can be confusing. To facilitate the process, we have compiled a directory of manufacturers that have distribution in Louisiana. This directory can be used to gather manufacturer information if you are considering purchasing, and the companies can be contacted directly to get a contact list of sawmill operators located within a certain radius of a selected zip code.

The top three largest-selling portable sawmill manufacturers (based on Internet sales) are:

1. **ENERCRAFT/BAKER** has more than 27 years combined experience in manufacturing sawmill equipment. Through continuous improvements to the equipment, Enercraft is a leader in the industry for both portable band sawmills and band resaws.
 - The Wood Buddy is a basic sawmill designed to turn fallen timber (up to 28 inches) into boards and squares
 - The Model 18HD/HP/M are sawmills that produce material for the farm or construction or people want to make extra money on the side but yet are on a budget.
 - The Model 3638G is an affordable heavy-duty portable sawmill that can tackle logs up to 36 inches in diameter.
 - The Model Blue Streak beefed up the Model 3638 sawmill with a 2-inch band blade and a 65-HP Cummins diesel engine

Enercraft/Baker Sawmills can be reached at: www.baker-online.com Tel: 800-548-6914

2. **TIMBERKING** is one of the largest portable sawmill manufacturers in the United States. TimberKing offers three different models to serve three very different needs:

- The 1220 mill is suited to small, occasional cutting projects on the farm or at hunting / fishing camps.
- The 1600 has more productive capacity with features like hydraulic power feed, hydraulic blade up/down and available hydraulic log loaders.
- The B-20 is the choice for using a mill as part of a full-time business venture.

TimberKing can be reached at: www.timberking.com Tel: 800-942-4406

3. **WOOD-MIZER** is the largest-seller of portable sawmills in the United States. This Indianapolis, Indiana, company has been in business for over 20 years with years of experience and thousands of manufactured mills.

No other company can match Wood-Mizer's selection of mills. They offer two small personal-sized mills for small weekend jobs, four professional-sized mills for increased production using larger logs and industrial-strength bandsaw mills that can match circular saws in productivity.

Wood-Mizer can be reached at: www.woodmizer.com Tel: 800-553-0182

Those interested in *second-hand* equipment should visit the following sites (listed alphabetically):

Ben Jones Machinery: www.benjones.com Tel: 706-324-2604

LBX Online. www.lbxonline.com Tel: 800-315-9950 ext. 601

Machinery Sales Co.: www.machinerysales.com Tel: 866-241-2977

Sawmill Exchange: www.sawmillexchange.com Tel: 800-459-2148

Used Sawmill Equipment: www.usedsawmillequipment.com Tel: 705-340-0106
