NOAAWatch website is a Web portal offering information about ongoing environmental events, and explains the role of NOAA in prediction, monitoring, and recovery from environmental hazards. It provides public access to current information on a number of environmental threats ranging from oil spills, to hurricanes and tsunamis, to space weather.

The National Hurricane Center normally issues public advisories on their website and to the media for Atlantic tropical cyclones every six hours at 4:00AM CDT, 10:00 AM CDT, 4:00 PM CDT, and 10:00 PM CDT. Intermediate public advisories may be issued every 3 hours when coastal watches or warnings are in effect, and every 2 hours when coastal watches or warnings are in effect and land-based radars have identified a reliable storm center. Additionally, special public advisories may be issued at any time due to significant changes in warnings or in the cyclone.

**Louisiana 511
Traveler
Information**

Louisiana 511 Traveler Information is a free service of the Louisiana Department of Transportation and Development. Travelers can dial **511** or visit www.511la.org for around-the-clock, real-time traffic updates as well as information about construction activities and weather-related road conditions simply by saying the route or region about which they are seeking information. The regions are: North West, North East, Central, South West, North Shore, South Central, and South East. In case of evacuation, information will be available through 511 on such important topics as contraflow status.

Residents without access to 511, or anyone calling from outside of the state of Louisiana, can access the 511 Traveler Information Service by calling **888-ROAD-511 (888-762-3511)**.

For more information, visit the Louisiana 511 Traveler Information website at www.511la.org.
