A password is your shield against predators, let's make it iron clad! Passwords need to be at least 8 characters long and use lowercase letters, uppercase letters, numbers and symbols. Instead of using your name, you can start with a phrase from a song, poem, or quote. For example, consider the first words of the Gettysburg Address, Four Score and Seven Years Ago. This phrase can be represented as 4S&7yerSa. What could your unique password be? Create a secure password using what you learned that is 8 characters long.
