

Economic Impact of Forestry and Forest Products

on Louisiana's Fifth Congressional District

The forestry and forest products industry in Louisiana's 5th Congressional District has a total economic impact amounting to **18,245 jobs and \$1.1 billion in income** during 2012. Forestry and the forest products industry generated an output of \$4.5 billion in the district. Total industry output is defined as the value of all goods and services produced in the district. **Value-added amounted to approximately \$1.7 billion.** Value-added represents the creation of new wealth, and is inserted into the economy through payments made to workers, interest, profits and indirect business taxes.

In addition, **the tax impact was estimated to be approximately \$290 million** with \$185 million in federal and \$104.5 million in state and local taxes. The forestry and forest products impacts on the economy of Louisiana's Fifth Congressional District are summarized in the right column and detailed in **Table 1**.

These results were obtained using IMPact Analysis for PLANning (IMPLAN), an input-output model. Using input-output analysis to track how the inputs of one sector of the economy are the outputs of other sectors can allow for a greater appreciation of the economic importance of a sector or group of sectors to the overall economy.¹
