Repair window and door screens to keep mosquitoes out of your home.

Use an insecticide to spray areas of thick vegetation in your landscape.

Remove debris from your yard.

Mow grass regularly and keep shrubbery trimmed.

Always choose a pesticide that is registered with the Environmental Protection Agency (EPA) for your intended use.

Protect Yourself

- Avoid mosquito bites.
- Wear a mosquito repellent each time you go outside.
- Avoid outdoor activities from dusk to dawn – when mosquitoes are more active.
- Wear long-sleeve shirts and long pants, when possible, and avoid dark colors.

Fight Mosquitoes

- Don’t allow water to stand – or treat standing water with approved insecticides to kill mosquito larvae.
- Repair window and door screens to keep mosquitoes out of your home.
- Use an insecticide to spray areas of thick vegetation in your landscape.
- Remove debris from your yard.
- Mow grass regularly and keep shrubbery trimmed.

Use Pesticides Safely, Effectively

- Read and carefully follow label directions on any insecticides or mosquito repellents you use.
- Always choose a pesticide that is registered with the Environmental Protection Agency (EPA) for your intended use.
