High Antioxidant Fruit Pomace

Inventors: John W. Finley, Sungjoon Jang, Zhimin Xu

Description:

A new method has been discovered to recycle the fruit waste product known as pomace into a tasty food ingredient high in antioxidants and fiber. As a waste byproduct, pomace is very affordable and can be cheaply processed into a valuable ingredient. Many of the sugars and calories are also removed during processing, making this a healthy way to get important nutrients.

Advantage:

- Increased antioxidants
- Increased fiber
- Decreased calories
- Low cost materials
- Low cost manufacturing process

Commercial Uses:

- Food Ingredient
- Dietary Supplement
