

SUGARCANE RESEARCH
ANNUAL PROGRESS REPORT

2009

No part of this report may be reproduced in any form without giving the complete source of information.

This report is from 2009 only and should be regarded as preliminary. Complete research is reported in appropriate Louisiana Agricultural Experiment Station and Louisiana Cooperative Extension Service publications and/or other professional publications.

FOREWORD

Research on sugarcane in the Louisiana Agricultural Experiment Station is an integral part of the LSU Agricultural Center's research-extension effort to provide the knowledge and technology base for efficient production and processing of sugarcane. Sugarcane research projects are led by scientists in the Sugar Research Station, Audubon Sugar Institute and the Department of Agricultural Economics and Agribusiness, School of Plant, Environmental, and Soil Sciences, Department of Biological and Agricultural Engineering, Department of Entomology, and Department of Plant Pathology and Crop Physiology.

Members of the Louisiana Agricultural Experiment Station maintain close working relations with colleagues in respective departments of the College of Agriculture and other colleges of the LSU Baton Rouge campus, the Louisiana Cooperative Extension Service, the Agricultural Research Service and Natural Resources Conservation Service of the USDA, the American Sugar Cane League, and the Louisiana Department of Agriculture and Forestry.

A major portion of the resources for production research is linked to the Sugar Research Station located at St. Gabriel, Louisiana. Processing research is linked to the Audubon Sugar Institute located at St. Gabriel, Louisiana. The Iberia Research Station helped to accomplish specific sugarcane research objectives in 2009.

Important parts of the 2009 research effort were conducted on cooperating farms and in cooperating factories. These activities are important and must be continued. The cooperation of individual growers in conducting field research projects and financial support from the American Sugar Cane League are gratefully acknowledged.

Table of Contents

	<u>Page #</u>
<u>FOREWORD</u>	ii
<u>2009 SUMMARY</u>	
Economic Importance of Louisiana Sugarcane Production in 2009	1
Sugarcane Summary for Crop Year 2009	4
<u>VARIETY DEVELOPMENT</u>	
An Overview of 2009 Activities in the LSU AgCenter Sugarcane Variety Development Program	7
2009 Photoperiod and Crossing in the LSU AgCenter Sugarcane Variety Development Program	10
Selections, Advancements, and Assignments of the LSU AgCenter Sugarcane Variety Development Program for 2009.....	22
2009 Louisiana Sugarcane Variety Development Program Nursery and Infield Variety Trials	41
2009 Louisiana “HoCP” and “Ho” Nursery & Infield Variety Trials	53
2009 Louisiana Sugarcane Variety Development Program Outfield Variety Trials	64
Sucrose Laboratory at the Sugar Research Station	81
LAES Sugarcane Tissue Culture Laboratory.....	82
The 2009 Louisiana Sugarcane Variety Survey.....	83
Artificial Neural Network Models as a Decision Support Tool For Selection in Sugarcane: A Case Study Using Cane Yield in Seedling Populations	97
The Effect of Naturally Occurring Off-Types on Sugar Yield and Yield Components In L 01-283	99
Yield and Fiber Content of High Fiber Sugarcane Clones	101
<u>ENTOMOLOGY</u>	
Small Plot Assessment of Insecticides against the Sugarcane Borer, 2009	102
Small Plot Assessment of Wireworm Control in Sugarcane, 2009	103
Evaluation of Aerial Insecticidal Control of the Mexican Rice Borer in Sugarcane, 2009.....	104
Oviposition Preference and Immature Development of the Mexican Rice Borer On Major Non-Crop Hosts	107

Small Plot Assessment of Insecticides against the Mexican Rice Borer	110
<u>PLANT PATHOLOGY</u>	
Pathology Research.....	111
<u>WEED CONTROL</u>	
Eptam Use in Sugarcane: Incorporation Methods, Weed Control, and Crop Tolerance.....	118
Investigation of Factors Affecting Suspension of Metribuzin DF in Spray Solution.....	122
Nutsedge Control in Sugarcane at Planting and in Spring.....	124
<u>CULTURAL PRACTICES</u>	
Billet Planting Research	128
Long Term Effects of Post-Harvest Residue Management	132
<u>SOIL FERTILITY</u>	
Soil Fertility Research in Sugarcane	135
Efficacy of Nutri-Phite™ as a Photosynthesis Regulator in Sugarcane	139
The Response of Sweet Sorghum to Nitrogen Fertilizer Rates	140
Monitoring of Soil Salinity After Hurricane Storm Surges	141
<u>ENVIRONMENTAL</u>	
Effect of Residue Management on Atrazine Retention and Sugarcane Yield Grown on Commerce Soil	143
<u>PHYSIOLOGY</u>	
Stalk Cold Tolerance of Commercial and Candidate Varieties.....	146
<u>ECONOMICS</u>	
Sugarcane Economic Research in 2009.....	150
<u>PLANT GROWTH REGULATORS</u>	
Ripener Update	152
<u>PUBLICATIONS IN 2009</u>	
	159
