

## Town Ants

Material	Rate of Application	Remarks
<b>Amdro Ant Block</b> (Hydramethylnon)	0.75 pound/colony	These ants are foliage feeders and do not sting. They will strip the foliage off ornamentals, vegetables and trees. The foliage is then chewed and used to grow a fungus that is the primary food source for the ants. Colonies can cover small areas or larger ones — up to 5 or 6 acres.
Christmas tree seedling or pine tree seedling plantations only – <b>PTM</b> (Fipronil)	2% dilution of PTM in water. Mix 2.6 oz. of PTM in 125 oz of water. Inject 1.5 fl. oz. of the dilution at least 3 inches below ground into each leaf cutter ant exit hole. Do not apply more than 21 fl. oz. PTM per acre, within 100 feet of water, or to trees grown for pine nuts.
