

SUGARCANE RESEARCH
ANNUAL PROGRESS REPORT

2005

No part of this report may be reproduced in any form without giving the complete source of information.

This report is from 2005 only and should be regarded as preliminary. Complete research is reported in appropriate Louisiana Agricultural Experiment Station and Louisiana Cooperative Extension Service publications and/or other professional publications.

FOREWORD

Research on sugarcane in the Louisiana Agricultural Experiment Station is an integral part of the LSU Agricultural Center's research-extension effort to provide the knowledge and technology base for efficient production and processing of sugarcane. Sugarcane research projects are led by scientists in the St. Gabriel Research Station, Audubon Sugar Institute and the departments of Agricultural Economics and Agribusiness, Agronomy and Environmental Management, Biological and Agricultural Engineering, Entomology, and Plant Pathology and Crop Physiology.

Members of the Louisiana Agricultural Experiment Station maintain close working relations with colleagues in respective departments of the College of Agriculture and other colleges of the LSU Baton Rouge campus, the Louisiana Cooperative Extension Service, the Agricultural Research Service and Natural Resources Conservation Service of the USDA, the American Sugar Cane League, and the Louisiana Department of Agriculture and Forestry.

A major portion of the resources for production research is linked to the St. Gabriel Research Station located at St. Gabriel, Louisiana. Processing research is linked to the Audubon Sugar Institute in St. Gabriel, Louisiana. The Iberia Research Station helped to accomplish specific sugarcane research objectives in 2005.

Important parts of the 2005 research effort were conducted on cooperating farms and in cooperating factories. These activities are important and must be continued. The cooperation of individual growers in conducting field research projects and financial support from the American Sugar Cane League are gratefully acknowledged.

Table of Contents

	<u>Page #</u>
<u>FOREWORD</u>	i
<u>2005 SUMMARY</u>	
Sugarcane Summary for Crop Year 2005	1
St. Gabriel 2005 Weather Overview	5
<u>VARIETIES</u>	
An Overview of 2005 Activities in the LSU AgCenter Sugarcane Variety Development Program	10
2005 Photoperiod and Crossing in the LSU AgCenter Sugarcane Variety Development Program	13
Selections, Advancements, and Assignments of the LSU AgCenter’s Sugarcane Variety Development Program for 2005.....	22
2005 Louisiana Sugarcane Variety Development Program Nursery and Infield Variety Trials	47
2005 Louisiana “HoCP” Nursery & Infield Variety Trials	64
2005 Louisiana Sugarcane Variety Development Program Outfield Variety Trials	73
Sucrose Laboratory at St. Gabriel.....	88
The 2005 Louisiana Sugarcane Variety Survey.....	89
Trap, a New Tool for Sugarcane Breeding: It’s Comparison with AFLP and Coefficient of Parentage	99
<u>ENTOMOLOGY</u>	
Small Plot Assessment of Insecticides Against the Sugarcane Borer.....	126
Small Plot Assessment of Insecticides Against the Mexican Rice Borer	128
Early Season Evaluation of Sugarcane Varietal Resistance to the Sugarcane Borer	129
Monitoring of Sugarcane Borer Resistance to Tebufenozide (CONFIRM)	130
Resistance to the Sugarcane Aphid Among Commercial Sugarcane Cultivars in Louisiana...	132
Monitoring Mexican Rice Borer Movement.....	134
<u>PLANT PATHOLOGY</u>	
Pathology Research.....	138
<u>WEED CONTROL</u>	
No-Till Sugarcane – Agronomic and Economic Implications.....	147

Red Morningglory (<i>Ipomoea coccinea</i> L.) Response to Shade and Soil-Applied Herbicides	148
Interference of Purple Nutsedge (<i>Cyperus rotundus</i> L.) in Louisiana Sugarcane	150
Alternatives to Tillage/Herbicide Programs in Fallowed Sugarcane Fields	151
Alternative Crops for Fallowed Sugarcane Fields	152
<u>CULTURAL PRACTICES</u>	
Billet Planting Research	153
Residue Management Research in Sugarcane in 2005	156
The Influence of Fallow-Period Soybeans on Sugarcane Seedling Emergence and Productivity	158
Development of Precision Farming Sensors for Sugarcane	159
<u>SOIL FERTILITY</u>	
Fertilizer Studies on Sugarcane in 2005	162
Variable-rate Nitrogen Fertilization of Sugarcane	166
<u>ENVIRONMENTAL</u>	
Evaluation of the Effects of Combine-Residue Management on Sugarcane Production and Water Quality	167
Effect of Salt Water Stress on Sugarcane Shoot Emergence After Planting	168
A Survey of Soil Salt Content Resulting From Hurricanes Katrina and Rita	170
Impact of Sugarcane Mulch Management Strategies on Water Quality and Crop Yield	172
<u>ECONOMICS</u>	
Economic Research in Sugarcane in 2005	179
<u>PLANT GROWTH REGULATORS</u>	
Timing of Glyphosate Applications, Alternatives to the Use of Glyphosate and Response of New Varieties to Glyphosate in Maximizing the Yield of Sugar Per Acre of Louisiana Sugarcane in 2005	182
<u>PUBLICATIONS AND PRESENTATIONS FOR 2005</u>	192
