## **Method to Add Omega-3s to Drinks**

Inventor: Zhijun Liu

### **Description:**

This invention is a new method to add omega three fatty acids from fish oil into beverages. The process creates a fish oil mixture using natural compounds and simple processing methods. Added sweeteners allow the mixture to be used in sweet drinks and mask the flavors of the fish oil. Experimentation has made the compound stable at room temperature for an extended period.

### **Advantages:**

- Adds significant amounts omega three fatty acids
- Uses all natural ingredients
- Simple, few step process

### **Commercial Uses:**

- Health drinks
