Re: SAR and Alkalinity Ratings and Interpretations for Irrigation Water Samples

<u>Test</u>	<u>V. Low</u>	<u>Low</u>	<u>Med</u>	<u>High</u>	<u>V. High</u>
SAR	5	5 – 10	11- 18	19- 26	27
Alkalinity	25	25 – 50	51 – 200	201 – 400	401
SAR Index		15	15 – 35	35 – 50	51

Don't know if we need to use the SAR Index, just thought I'd throw that in for your use, if needed.
Let's use the SAR and Alkalinity .
