

SUGARCANE RESEARCH
ANNUAL PROGRESS REPORT

2008

No part of this report may be reproduced in any form without giving the complete source of information.

This report is from 2008 only and should be regarded as preliminary. Complete research is reported in appropriate Louisiana Agricultural Experiment Station and Louisiana Cooperative Extension Service publications and/or other professional publications.

FOREWORD

Research on sugarcane in the Louisiana Agricultural Experiment Station is an integral part of the LSU Agricultural Center's research-extension effort to provide the knowledge and technology base for efficient production and processing of sugarcane. Sugarcane research projects are led by scientists in the Sugar Research Station, Audubon Sugar Institute and the Department of Agricultural Economics and Agribusiness, School of Plant, Environmental, and Soil Sciences, Department of Biological and Agricultural Engineering, Department of Entomology, and Department of Plant Pathology and Crop Physiology.

Members of the Louisiana Agricultural Experiment Station maintain close working relations with colleagues in respective departments of the College of Agriculture and other colleges of the LSU Baton Rouge campus, the Louisiana Cooperative Extension Service, the Agricultural Research Service and Natural Resources Conservation Service of the USDA, the American Sugar Cane League, and the Louisiana Department of Agriculture and Forestry.

A major portion of the resources for production research is linked to the Sugar Research Station located at St. Gabriel, Louisiana. Processing research is linked to the Audubon Sugar Institute located at St. Gabriel, Louisiana. The Iberia Research Station helped to accomplish specific sugarcane research objectives in 2008.

Important parts of the 2008 research effort were conducted on cooperating farms and in cooperating factories. These activities are important and must be continued. The cooperation of individual growers in conducting field research projects and financial support from the American Sugar Cane League are gratefully acknowledged.

Table of Contents

	<u>Page #</u>
<u>FOREWORD</u>	ii
<u>2008 SUMMARY</u>	
Economic Importance of Louisiana Sugarcane Production: 2008 Agricultural Summary.....	1
Sugarcane Summary for Crop Year 2008.....	4
Sugar Research Station/St. Gabriel, Louisiana 2008 Climate Review	7
<u>VARIETY DEVELOPMENT</u>	
An Overview of 2008 Activities in the LSU AgCenter Sugarcane Variety Development Program	15
2008 Photoperiod and Crossing in the LSU AgCenter Sugarcane Variety Development Program	19
Selections, Advancements, and Assignments of the LSU AgCenter Sugarcane Variety Development Program for 2008.....	27
2008 Louisiana Sugarcane Variety Development Program Nursery and Infield Variety Trials	50
2008 Louisiana “HoCP” Nursery & Infield Variety Trials	63
2008 Louisiana Sugarcane Variety Development Program Outfield Variety Trials	74
Sucrose Laboratory at the Sugar Research Station	89
LAES Sugarcane Tissue Culture Laboratory.....	90
The 2008 Louisiana Sugarcane Variety Survey.....	91
The Effect of Naturally Occurring Off-Types on Sugar Yield and Yield Components In L 01-283	105
Comparison of Tissue Culture and Field Run Seed-Cane Sources	107
Starch in Sugarcane Processing and Prospects of Breeding for Low Starch Content in Sugarcane	111
<u>ENTOMOLOGY</u>	
Seasonal Role of Non-Crop Grasses In Stem Borer Population Dynamics	116
Small Plot Assessment of Insecticides against the Mexican Rice Borer	118
Assessment of Varietal Resistance to the Sugarcane Borer and Mexican Rice Borer	120
Monitoring Mexican Rice Borer Movement	123

Field Evaluation of Current Sugarcane Germplasm for Resistance To Sugarcane Aphid and Yellow Sugarcane Aphid	126
<u>PLANT PATHOLOGY</u>	
Pathology Research.....	128
<u>WEED CONTROL</u>	
Evaluation of Eptam (EPTC) in Sugarcane	137
Comparisons of Sugarcane Varieties for Growth and Shading Potential	139
Johnsongrass and Bermudagrass Growth Response to Shade	146
<u>CULTURAL PRACTICES</u>	
Billet Planting Research	148
Long-Term Combine-Harvest Residue Study	151
<u>SOIL FERTILITY</u>	
Soil Fertility Research in Sugarcane	152
The Response of Sweet Sorghum to Nitrogen Fertilizer Rates	165
Evaluation of Nitrogen Fertilizer Rates on HoCP 00-950	167
Response of Different Sugarcane Varieties to Potassium Fertilization	168
<u>ENVIRONMENTAL</u>	
Effect of Residue Management on Sugarcane Yield Grown on Commerce Soil	171
<u>ECONOMICS</u>	
Sugarcane Economic Research in 2008.....	174
<u>PUBLICATIONS IN 2008</u>	177
