

LSU AgCenter St. Mary Parish Profile

Fiscal Year 2024

ABOUT THE LSU AGCENTER

The LSU AgCenter is dedicated to providing innovative research, information and education to improve people's lives. Working in a statewide network of parish extension offices, research stations and academic departments, the LSU AgCenter helps Louisiana citizens make the best use of natural resources, protect the environment, enhance agricultural enterprises, and develop human and community resources.

PROGRAM HIGHLIGHTS

Family and Consumer Sciences

Our goal is to improve health in St. Mary Parish by creating community-led and sustainable initiatives to reduce food insecurity and increase access to safe physical activity. This is addressed through comprehensive healthy living education and healthy communities projects. The objectives are to have adults and youth increase their knowledge of nutrition and physical activity, understand the importance of time spent in physical activity and increase fruit and vegetable intake. The program strives to engage every sense in the learning process with hands-on activities and food tastings included in each series of lessons.

4-H Youth Development

Through non-formal, research based, experiential education activities, 4-H participants gain knowledge and life skills enabling them to become positive, productive, capable and compassionate members of their communities. Youth from most schools in St. Mary Parish participate in different activities during the school year. In the summer, many have the opportunity to attend state-wide events. 4-H is more than raising animals. 4-H provides different opportunities for everyone.

Agriculture and Natural Resources

Economic sustainability has been a major issue for both row crop agriculture and the seafood industry over the last few years. Even with recent storms and low commodity prices, the agriculture and seafood industries contributed a hefty \$60 million dollars to the economy of St. Mary parish in 2020. Producers and LSU AgCenter researchers are addressing value-added alternatives that will help maintain the viability and productivity of the agricultural and seafood industries in St. Mary Parish. Environmental challenges such as clean air and water, as well as the continued erosion of coastal habitats, persist as areas of concern. The fisheries program is emphasizing the natural resources of the Atchafalaya River Basin and coastal and marine fisheries, particularly crab and shrimp, with a particular focus on the education of Anglo and Asian-American clientele for the purpose of leadership development to help sustain the natural resource base.

EXTENSION OFFICE

600 Main St Blevins Building, Franklin,
LA 70538
Phone: 337-828-4100

Office Hours:

8:00 a.m.-4:30 p.m.

The 2020 total dollar amount from these commodities were: Animal enterprises, \$965,703, Aquaculture and wildlife, \$7,077,529, Plant enterprises, \$63,665,979. Land area — 555.84 square miles; Population — 47,789; Population under 18 years old — 23.9%; Population 65 years old and over — 18.1%; Median household income — \$43,097; Persons below poverty — 22.9%

LOCAL ISSUES AND PLANS FOR THIS YEAR:

Promote the wide use of natural resources and protection of the environment.

- Continue youth educational programs for coastal issue management.
- Write and distribute fisheries-related educational newsletters and other related extension literature.

Increase productivity and profitability of Louisiana agriculture.

- Conduct educational meetings on important issues facing the fishing industry.
- Continue dockside workshops and meetings on fisheries related areas.
- Continue marketing strategies for local fisheries industry.
- Continue programs on improving the quality and marketing of Wild Louisiana Seafood through better processes for protecting the catches.

Build leaders and good citizens through 4-H Youth Development.

- Conduct educational programs to youth through club meetings.
- Continue community service-learning projects.
- Continue educational programs through contest days, workshops, livestock shows and camps
- Continue character development and youth safety programs.

Strengthen families and communities

- Conduct nutrition programs that help create healthy communities by improving overall nutrition and increasing physical activity levels, in youth and adults, which will produce long-lasting behavior changes.

HOW IS EXTENSION FUNDED?

- Federal funding from the USDA/ NIFA.
- State general funds from the Louisiana Legislature.
- Local support from parish government, including police juries and school boards.
- Self-generated funds.

WHAT ROLE DO YOU PLAY?

Our stakeholders at the parish level are the local supporters and beneficiaries of the LSU AgCenter cooperative extension programs. Their support keeps these critical programs in their communities.

EACH PARISH OFFERS PROGRAMMING IN:

- 4-H and Youth Development.
- Agriculture and Natural Resources.
- Family and Consumer Sciences.
